Summary of Meeting

This was a scheduled meeting of the ANSI/NSPI-1 Committee and was held at the Ramada Plaza Hotel in Old Town Alexandria. CPSC staff attended the meeting to discuss the development of guidelines to address three hazards; disembowelment, hair entrapment, and body entrapment, associated with improperly installed or maintained drain covers. After opening introductions, an update on the progress of the CPSC guidelines for addressing the identified hazards associated with the use of pools and spas was given. Mr. Rowley of Rowley International pointed out that limb entrapment should be addressed as an issue separate from body entrapment. Mr. Wells of Aquarius Pools requested CPSC reports on suction related injuries. Mr. Digiovanni, Technical & Education Director for NSPI, advised the committee that he has the information and offered to distribute a summary to the committee.

CPSC staff requested input from the NSPI committee on determining a suitable test facility to test some of the theories proposed to address the entrapment hazards as well as assistance in acquiring the applicable codes to ensure consistency and relevancy with the guidelines CPSC is putting together.
